ABOUT

COMPANY HISTORY

It all started back in the 1950's when Lars Åke Bratt founded a wholesaler business for local barbershops in Stockholm. In the beginning the products he sold were limited to chemical products which he developed himself but it quickly grew into purified import and distribution business, offering hair tools and accessories to the professional hairdressing market. In the 70s' and 80s' many of today's brands like Oster, Joewell and Parlux became exclusive brands for Bratt and have been so ever since. In the early 90s' the two current owners, Leif Ahlquist and Christina Bratt took over. The company changed the name to Bratt Trading and the customer focus changed from the local hairdressers to wholesalers in the Nordic countries. The most recent expansion was in October 2012, when Bratt Trading moved to a new, 3200 m² large premises in order to keep up with the ever growing demand.

BRATT TRADING TODAY

Bratt Trading is, what we like to call, a master distribution company focusing on hair tools for the professional market. As a master distributor, we only sell to wholesalers in the hairdressing industry. We have always highly valued having a streamlined organization for flexibility with the highest possible degree of personal customer service. Our main focus when it comes to products is to select the best of everything instead of simply having everything, and to always represent brands before private labelling. Over the years we have gained the opportunity and honor to represent many of the world leading brands for professionals in the hair industry, as you will see when you continue through this book.

JOEWELL®

Joewell is the leading brand in its home market, Japan, as well as having very strong market positions in many European, Asian and American markets. The company was established in 1917 under the name Tokosha, originally manufacturing medical cutting tools but started manufacturing scissors for barbers in 1921. Years of research and development have resulted in no less than 200 different models for their various markets.

The Professional Edge

SYMMETRIC HANDLE

The symmetry of the handle design is widely appreciated as the basic style for beauty salons. Symmetric design makes it possible to use both sides of the scissors or to change the way the scissors are held for a greater degree of freedom.

OFFSET HANDLE

The length of the handle grip differs between still blade and moving blade. Offset handles easily fit the hand so the wrist, elbow and shoulder do not tire easily when opening or closing the scissors. Various angles and designs are available in offset types so please select according to your preference.

THINNING SCISSORS

Thinning scissors have a serrated edge, and they can be used to add texture to a haircut, remove bulk from thicker hair or to blend the ends of the hair.

Established in 1965, the Wako Group started out in Japan to later expand with a new factory in Taiwan in 1980. Today the two establishments work side by side and with their combined experience they bring something very special to the table. By focusing heavily on development of new and technically advanced materials throughout the years, their current range of products satisfy the high expectations of the most notoriously demanding stylists. At the same time, they live up to the high levels of comfort to please the customers.

LASH LIFTING
SILICONE PAD, SIZE M

The Medium size is recommended for clients with thick lashes. Clients with hooded eyelids benefit from the medium size pad. If the small pad is used with hooded eyelids, it can potentially lift the lashes too much causing the lashes to curl back on the client's eyelids

Art.Nr: 6081

SILICONE PAD, L

BIOSMETICS
LASH LIFTING
SILICONE PAD, SIZE L

Clients with very long and straight lashes benefit from the large size pad. Also, clients with very curly lashes that are planning to have semi-permanent lash extensions applied benefit from the large size pad as it provides just the right lift making the application of extensions easier.

The brush helps to spread color on both the upper and lower layers during the same time. By using the iBlend brush you can avoid abundance of color. **Features:** Dual length bristles easily penetrate through the hair & scalp-hugging shape, every bristle makes contact with scalp. Evenly distributes color products, avoids over saturation.
